BR630V series

BR630V series modern gray concept effectively increase premium prestigious impression of guard house entrance at any high end lifestyle residential or premium commercial building. Impress your guest when they visit you at your luxury home or designer building.

## BARRIER GATE

### LOWER MAINTENANCE

**BlueSpeed** motor uses lowest possible rotation speed (RPM) that reduces mechanical wear and effectively eliminates any maintenance servicing on the motor.

**BLUESPEED** MOTOR

### MINIMUM DOWNTIME

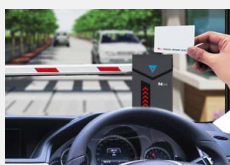

**DSP** (Dual Spring Pull) and quick access to local spare parts, rest assured the barrier gate will be up and running most of the time.

**DSP**

### STYLISH & BOLD

**New** design housing with integrated LED arrow.

### 2 TIMES SAFER

**DDS** (Dual Detection Safety) uses dual sensor to auto reverse the arm if blocked by obstacle. This is a important double safety feature to prevent further damage in the event when arm hit car or pedestrian.

**DDS**

### ENHANCED FUNCTIONALITY

**Built-in** DC 12V 5A power supply for LED arm and traffic detector. Recommended LED arm for enhanced visibility.

## FEATURE

We want you to have peace of mind using our barrier gate.

### Better protection for your car

Arm will swing out when hit directly by vehicle (only BR618V & BR630V) from the front.

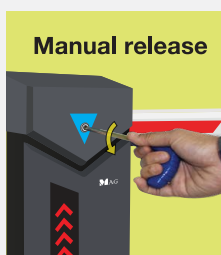

Foam lining installed underneath our arm is specially designed with the right density to absorb bigger impact force to avoid dent when arm accidentally hit your car.

### More convenient

Telescopic capability shorten the arm length to eliminate the need of big truck to transport arm to site. Less hassle for you when ordering replacement arm.

During power failure, MAG manual release clutch design make it more convenient for you to unlocked and manually open or close arm without removing whole top cover.

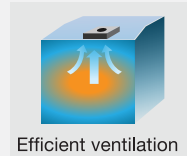

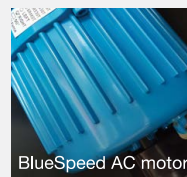

### Telescopic arm length after retracted

Full	Retracted
4.5m	2.9m
4m	2.68m
6m	3.56m

### Work harder and longer for you

Compared to other types of motor, BlueSpeed AC motor is simpler, more affordable and stronger to easily lift up the arm even with additional signage. It does not use any carbon brush and therefore is maintenance free. It is designed with efficient air cooling system to support higher traffic flow at your building.

Certified by:

### FASTER INSTALLATION

No road cutting for loop coil. Can be easily mounted outside on barrier gate housing in less than 30 minutes. This help you save more money in installation labour cost

### EXTRA SAFETY

Able to detect any obstacle including people to effectively auto reverse barrier arm earlier "before" hitting anyone.
